Innosuisse

TRUST VALLEY

Companies are deploying agents they don't control.

1 → N

Today, each solution provider embeds its own agent.

3 min

for any employee to copy their process into an agent

+50%

companies can't see what their agents do

WITHOUT GOVERNANCE

- Data leaks
- Financial losses
- Regulatory fines
- No compound knowledge

The platform for governed agentic adoption.

See

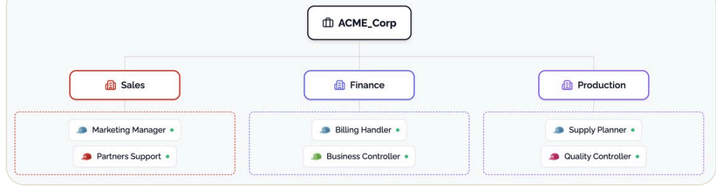
Full visibility on every agentic capability

Control

Compliance risks blocked before they happen

Measure

Every cent saved or generated, quantified



The AI workforce, organized

skilder centralizes AI capabilities as roles that agents pull where they run.

4 hours
saved per week on agent maintenance

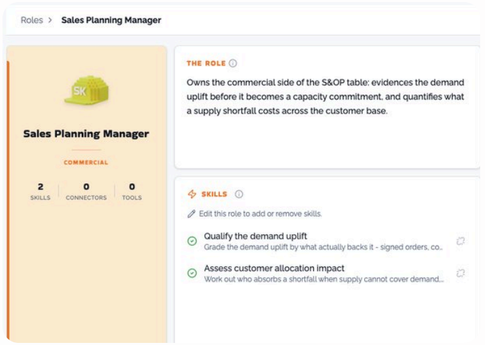
up to 80%
cut from token costs

10×
faster adoption across teams

Every role a company builds stays with it and improves with use.

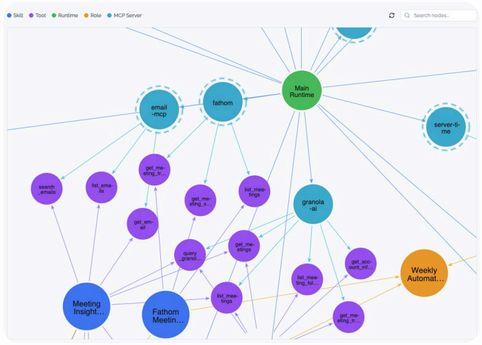
01 Build & own

the business authors the role and owns it



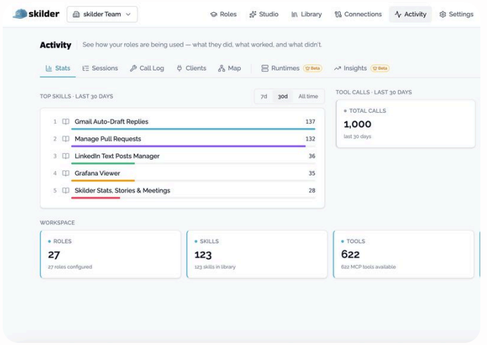
02 Deploy

guardrails and dependencies on, any AI model



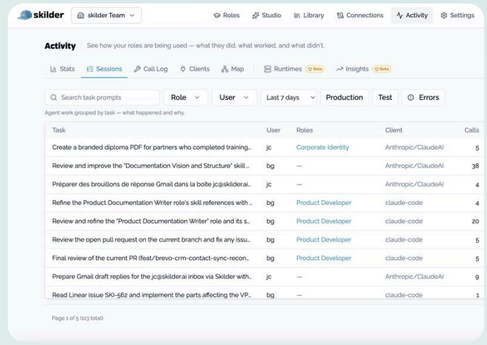
03 Observe

every usage traced and quantified



04 Improve

usage rewrites the role



THE MOAT

The know-how compounds while models and vendors come and go.

Multiplayer, agnostic, composable, governed.

	Agent platforms Claude, Copilot…	Tool gateways Composio, Runlayer	Observability Langfuse	skilder
Capability lifecycle management	partial	✗	✗	✓
Non-technical authoring	partial	✗	✗	✓
Per-capability audit & ROI	✗	partial	partial	✓
Model & harness agnostic	✗	✓	✓	✓
Token cost governance	partial	✗	partial	✓
Compounding capability asset	partial	✗	✗	✓

Pricing scales with the number of capabilities, not user seats.

PLAN 01

Starter

Free + pay as you go

100 capabilities
Executions billed per use

PLAN 02

Team

from €6k / year

500 capabilities
10k executions / month

PLAN 03

Enterprise

from €50k / year

Unlimited capabilities
Custom execution volume

Every company will run an AI workforce.
We make it accountable.
